Forum Objectives:

- Explore the conceptual framework and lessons learned of Health & Medicine's Behavioral Health-Primary Care Integration Learning Collaborative established from the three years of shared learning.
- Highlight three topic areas – data exchange; hospital transitional care; and financial sustainability – to understand what local collaboration can learn regarding best practices and current challenges to integrated care.
- Explore lessons being learned in other collaboratives working on similar BH-PC integration efforts.
- Identify policy reform opportunities to improve statewide behavioral health-primary care integration, and create recommendations for local and state-wide advocacy.
